Project for NextMake JP

SKILLS

Web / App Development

User Quality Assurance

UI/UX

Software Architecture

My Services / What I'm Offering

WEB DEVELOPMENT

I specialize in developing high-quality, responsive web applications and sites for any purposes or occasions.

I am familiar with many modern web development languages and technologies such as HTML5, CSS, Tailwind, JavaScript, Node.js, PHP, MySQL, MongoDB, and Laravel.

I focus on delivering clean and reusable code while providing the users with a good experience.

APPLICATION DEVELOPMENT

I provide modular and reusable code to develop applications that can be adaptable to your business needs.

I develop with modern programming languages such as C++, Python, Java, and JavaScript. I am also well-immersed in the field of data engineering and AI, where I can implement ML models.

I focus on developing beyond traditional applications to include data-driven solutions.

PROJECTS THAT I WORKED ON

- Chatbot Application
- Terminal Chatting App
- E-Commerce Websites
- Online School Website
- Movie Recommendation Website
- Sudoku Solver Application
- Portfolio Adventure Game
- Japanese Quiz Game
- Jumping Knight Game
- List Searching/Sorting Application
